

TRAINING & EDUCATION

Seamlessly Import CAD

Immersive Interaction with 3D Models

Write on Virtual Whiteboards

Share Slideshows, Videos
and Documents

Record and Playback Features

Make your training more streamlined, engaging and memorable without the expense of travel or disassembling your in-service products.

Harness the intuitive power of show-and-tell to present clear solutions to complex problems.

COLLABORATION

A new virtual experience which allows people and organizations anywhere in the world to transcend collaborative barriers and increase productivity.

Lifelike Environments

On-the-fly Adaptability

Multiple VR Device Support

Intuitive Controls

Unrivaled Tech Support

DESIGN & ENGINEERING

CAVRNUS is the most immersive, engaging and productive virtual solution for design and engineering professionals.

Reach into a 3D model of your prototype, grab a component and hand it to your design partner while you discuss improvements. Collaborate with the intuitiveness of real world manipulations in ways previously impossible or cost-prohibitive.

Whether your colleagues are down the hall or across the world, CAVRNUS combines the collaborative tools you'd find in traditional design meetings with the added capabilities and efficiencies of the virtual experience.
